PROFESSIONAL SUMMARY

Full Stack Java Developer with 1+ years of experience building scalable web applications using **Java**, **Spring Boot**, **REST APIs**, and **MySQL** across LMS, e-commerce, healthcare, and education domains. Currently gaining hands-on, project-based exposure to Microservices architecture, **Apache Kafka**, and **Redis** while contributing to an enterprise LMS platform. Built an AI-powered business review platform using the OpenAI API, including prompt design and a **React** dashboard. Solid foundation in **OOP**, **MVC**, and relational database design, with a track record of shipping features end to end. Available for immediate joining.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frontend: React JS, AngularJS, HTML5, CSS3, Bootstrap

Backend: Spring Boot, Hibernate, REST APIs, MVC

Database: MySQL, PostgreSQL, JDBC

Currently Building Hands-On Experience: Microservices Architecture, Apache Kafka, Redis

AI & Integrations: OpenAI API (Chat Completions), Prompt Engineering, REST API Integration

Tools: Git, GitHub, Postman, VS Code, Eclipse, Spring Tool Suite (STS)

Concepts: OOP, MVC, JDBC, Event-Driven Architecture (fundamentals)

WORK EXPERIENCE

Full Stack Java Developer | Nebula Technology Feb 2026 – Present

- Contributing to the development of an enterprise **Learning Management System (LMS)** built on **Spring Boot** with **Microservices architecture**, gaining hands-on experience in service design and inter-module communication
- Working with **Apache Kafka** for event-driven communication between microservices, learning topic design for enrollment, payment confirmation, and notification events under senior guidance
- Exploring **Redis caching strategies** for course content, session data, and fee status lookups to support low-latency API responses
- Developing **Spring Boot REST APIs** for course management, student enrollment, and assessment modules, covering schema design through API implementation
- Contributing to the **Finance Module** by helping design parts of the **MySQL schema**, including tables for fee plans, payment transactions, and invoices
- Participating in **Agile/Scrum** sprints with daily standups, sprint planning, and code reviews using Git & GitHub

IT Data Consultant – Software & Data Systems | Wynisco Solutions Pvt. Ltd. May 2025 – Feb 2026

- Engineered an automated Java-based web scraping system targeting **5+ USA job platforms** to extract security clearance job listings, aggregating **1,000+ records/day** into a centralized data pipeline
- Built multi-platform scraping workflows using Java to concurrently discover and collect clearance-level postings from portals like ClearanceJobs, Indeed, and LinkedIn, ensuring **95%+ data coverage**
- Developed data transformation and validation logic to clean, deduplicate, and normalize scraped job records — processing fields like title, location, clearance level, and salary before pushing to **MySQL**
- Integrated the scraping pipeline with the company's **Chrome browser extension**, enabling real-time one-click job data capture and JDBC-based push to the backend database
- Optimized SQL batch insert queries and connection pooling logic, improving database write performance by **35%** across high-volume daily scraping jobs

PROJECTS

LMS – Learning Management System | *Spring Boot • Microservices • MySQL • Kafka • Redis • React JS*

- Contributing to an enterprise LMS platform at Nebula Technology, gaining practical experience with **Microservices architecture** across course management, enrollment, and finance modules
- Assisting in MySQL schema design for the **Finance Module**, including fee plans, payment transactions, and invoices
- Learning **Apache Kafka** for inter-service event communication and exploring **Redis caching** for performance optimization

AI-Powered Business Review Analyzer | *OpenAI API • React JS • Spring Boot • MySQL*

- Built an AI-driven review analysis platform using the **OpenAI Chat Completions API** to generate business growth insights from customer reviews for retail and service businesses
- Integrated **OpenAI API** with a Spring Boot backend, designing prompts to extract sentiment, identify pain points, and produce structured improvement recommendations
- Developed a **React JS** frontend with dynamic dashboards to present AI-generated insights, review trends, and performance metrics
- Implemented RESTful API endpoints to manage review ingestion, orchestrate OpenAI requests, and cache responses to reduce repeated API calls

EliteStore – Online Shopping & Management Platform | *Spring Boot • React JS • Hibernate • MySQL*

- Built a full-stack e-commerce platform using Spring Boot, Hibernate ORM, and MySQL with the MVC pattern, supporting **100+ products and 50+ concurrent user transactions**
- Developed **15+ RESTful API endpoints** for CRUD operations across user, product, and order modules, spanning **10+ relational database tables**
- Built a responsive React JS frontend with authentication and order tracking, reducing manual order-handling effort by **40%**
- Designed admin modules for product catalog management, order lifecycle tracking, and delivery status updates

ClassTracker – Academic Performance & Tracking System | *Spring Boot • MySQL • REST APIs*

- Built a role-based academic management system with Spring Boot and MySQL, supporting **200+ student records** across admin, teacher, student, and tutor roles
- Designed and deployed **10+ REST APIs** automating performance tracking and report generation, reducing manual data entry time by **30%**

EDUCATION

B.Sc. Computer Science | Sinhgad College of Science, Pune | 2023 – 2025

Diploma in Computer Technology | Eklavya Polytechnic, Pune | 2020 – 2023

CERTIFICATIONS

- Full Stack Java Development | Java by Kiran — Core Java, Spring Boot, Hibernate, REST APIs, MySQL
- Generative AI Mastermind | Outskill — Issued by Vaibhav Sisinty, Founder, Outskill
